**THRASHER WORKS, LLC** is a professional architectural practice focused on design, quality, and superior client service. Established in 2015, Thrasher Works maintains a diversified practice offering comprehensive services in architecture, design, planning and consulting to residential, commercial and institutional clients across Texas.

While devoted to small to medium-scale projects, Thrasher Works has extensive experience in both commercial new construction and renovation. Thrasher Works has developed expertise in commercial interior renovations, big-box retail conversions, outpatient clinic design and ambulatory surgery centers.

The firm is deliberately limited in size to maintain the highest degree of project supervision on all projects by its principals and associates. With an emphasis on client service, Thrasher Works' projects are executed with commitment to quality design, creative problem solving and quick responses.

In addition to extensive experience in all phases of the architectural process from programming to construction observation, Thrasher Works provides clients with the following services:

- Architecture
- Interior design
- Residential design
- Site analysis and feasibility
- Zoning and code consulting
